

Aneurysm of the Left Common Iliac Vein as the Cause of Recurring Pulmonary Thromboembolism (Case Report)

Yu. A. Mironova, A. V. Filippov, A. V. Shved

Republican Clinical Hospital named after N. A. Semashko, Radiology Department,
Simferopol

Abstract

A rare clinical observation: common iliac vein's aneurysm as a reason of recurrent pulmonary thromboembolism in a 64-year-old female is presented. After setting of IVC-filter episodes of thromboembolism stopped.

Key words: Venous Aneurysm, Pulmonary Thromboembolism, Computer Tomography.
