Abstract

Nowadays most experts who follow the modern global medical community trends are aware of the English language knowledge necessity at a basic level at least. The lack of the unified terminology, the multiple items of the same concepts, lots of obsolete terms, incorrect spelling, pronunciation of eponyms especially – all these things are the problem of Russian medical language as well. These factors combination was account the basis for the publications series creation entitled «English Terms Glossary» for the «Radiology – practice» journal, which will be published in subsequent issues.

Key words: English Terms Glossary, Bones, Joints, Muscles, Tendons, Ligaments.
