

Thoracolithiasis: A Case Report and the Literature Review

V. A. Nechaev, I. A. Bondarenko

City Clinical Hospital № 4, Department of Healthcare of Moscow

Abstract

Thoracolithiasis is a rare pathological condition characterized by the presence of a mobile lesion with calcification in the pleural cavity. About 80 clinical cases of thoracolithiasis are described in the English-language literature. There weren't found the similar cases in the Russian-language literature. In this article clinical case of a randomly detected thoracolith using computed tomography is described and a literature review of the relevant topic was conducted.

Key words: Thoracolithiasis, Pleurolith, Pleural Stone, Intrathoracic Calculus, Computed Tomography.
