

Ultrasound Examination in Soft Tissue Assessment the Maxillofacial Region (Lecture)

M. V. Smylenova

Moscow State University of Medicine and Dentistry named after A. I. Evdokimov,
Ministry of Healthcare of Russia, Department of Radiology

Abstract

The possibilities of ultrasound examination in the diagnosis of soft tissue diseases of the maxillofacial region are shown. Marked by high informative value of sonography in the first stage of diagnostic search and in the differential diagnosis of pathological changes in the soft tissues of the head and neck.

Key words: Ultrasound Examination, Soft Tissue, Maxillofacial region.
